

The Environmental Crisis

The Fight For Our Future

The problem of climate change is the most severe crisis of our time. The future of life on this planet is at risk. Despite the serious warnings of climate scientists, governments and corporations around the world continue down their same path of environmental destruction. We can't let the future of our species be in the hands of those who have wrecked the planet for so long. Join us for a discussion about this important issue.

Saturday February 20th at 3:30 pm
