

WARS ON THE PEOPLE

REPRESSION AND RESISTANCE AT HOME AND ABROAD

UNITED LEFT PLATFORM, an alliance of revolutionary socialist organizations, invites you to a webinar with an activist panel on confronting anti-immigrant terror and attacks on democratic rights at home, and U.S. imperial crimes around the world.

The roundtable represents some of the important experiences of the rising movements resisting the domestic and global rampages of U.S. imperialism under the Trump administration, with perspectives on how these struggles can become powerful, unified and politically independent. From beating back ICE terror in Minneapolis to opposing the U.S.-Israeli wars on Palestine, Iran and Lebanon, and the U.S. threats to Cuba and Latin America, we see the critical necessity of bringing them together for a common purpose of collective liberation. The panelists will discuss how concrete experiences of May Day organizing can connect domestic resistance to MAGA authoritarianism to opposition to U.S. wars and imperialism as a whole.
