We Are All Palestinians!

Throughout the U.S. and around the world – people have taken to the streets to express their outrage against Israel's latest slaughter of Palestinians. People are raging against the deluge of fire that is raining down on the Gaza Strip. In two weeks, Israeli bombings have killed hundreds, including many children. The toll is getting worse by the day.

The Biden administration has continued in lock-step with Israel, supporting them every step of the way, with Biden repeating the mantra that Israel has a right to defend itself. The U.S. has already vetoed three United Nations statements calling for an immediate ceasefire – continuing to give Israel a green light for this senseless massacre. The Biden administration has the blood of Palestinians on their hands.

Israel is the strongest partner of U.S. imperialism in the Middle East. And the same system that backs Israel's brutal assault on Palestinians is the same system that supports the routine murder of Black people by the police in the U.S.

The Palestinians represent the poor, the oppressed, and the exploited around the world, the millions left behind by a capitalist system of misery and oppression against all working-class and poor people, the millions facing common enemy – the wealthy and the powerful at the head of this system.

The Palestinians' struggle embodies the revolt of those everywhere who refuse to bow their heads, who refuse to give up. Whether in Myanmar, Colombia, or around the world, all workers and oppressed people must stand together! Exploitation and oppression have no borders, and neither do our struggles!

Palestine: An Uprising Against Zionism and U.S. Imperialism
