## ***Their Whole System is Guilty! Our Future is Up to Us!***

The murder of George Floyd has revealed the deep racism of this system for all to see. Governors may have declared states of emergency across the country, but tens of millions of Black people live in a state of emergency every single day.

Across the country, we are right to take to the streets. George Floyd's murder can not be forgotten. We can not remain silent or continue with business as usual. We have to stand against racist violence and organize and fight to protect the lives of us all.

We don't need cops with more body cameras. We don't need more promises of police reform. And we certainly don't need to be told to put our hopes in the November elections when their whole system of capitalism is guilty. We need to fight to put an end to this system once and for all.

The future this system holds out to us is a complete disaster. We cannot accept to live in a society that degrades and abuses us. We cannot tolerate to live under a system that puts our lives at risk.

It is time to organize our forces to bring about the world we want and need. What the future holds is up to us!
